## Jump Into Summer with JP's

### June 24 - June 28

Get the kids geared up for a week of fun and excitement! During this camp, they will enjoy two hours of jumping at JP's Jump Masters (walked over and watched by Ms. Sam and my awesome JP's staff the entire time). They will come back to FIA for lunch and **then head outside for water activities and games**. Please pack an extra set of clothes. One pair of jump socks will be included, if lost or forgotten they will need to purchase additional pairs. They may leave them at the school.

## MAD Science

### July 8 - July 12

- Monday - *Walloping Weather*
- Tuesday - *Mad Machines*
- Wednesday - *Watts Up*
- Thursday - *Science of Illusion*
- Friday - *Sonic Sound*

(link to activities) <https://triangle.madscience.org/workshop-info.aspx>

## SPEED & Agility

### July 15 - July 19

Created and coached by our very own Coach Kate!!!

Developing speed, power and agility with an athletes first step approach, while working on cognitive reaction drills to better prepare young athletes for all sports.

## Escapology

### July 22 - July 26

A physical adventure where players work in teams to solve puzzles, riddles, ciphers, pattern identification and locks. They will race to beat the clock. Win or lose all will learn something. Lead by our famous Ms. Betzy.

## STEM FOR KIDS

### July 29 - August 2

***STEM for Kids*** is a company out of Raleigh that specializes in giving kids a fun hands-on learning experience! Topic for the week:

Hitting the Funny Bone - Biomedical engineering, a new emerging field of engineering, deals with the application of engineering principles and design concepts to medicine and biology for healthcare purposes.

Closing the gap between engineering and life sciences, this is an exciting intersection of two classic industries: health and mechanical engineering.

Participants will explore the skeletal system of the human body. While learning about bone function, joints, fractures, participants will design their own cast and lower leg weight bearing prosthetic utilizing the Engineering Design Process.

August camps are offered to children going into K-12 years of age

## Catching your Dreams ART CAMP

(Taught by our new and talented Ms. Dalton...head of the HEART program)

### August 5 - August 9

*\*Students begin the week discussing their Favorite dreams and creating their very own "DREAM JOURNAL" that will be used for inspiration later in the week!*

\*Beginner Drawing and Painting techniques will be taught for all ages to create their very own "**Dreams on Canvas**" **acrylic painting of imaginary situations, animals or people**. We will also learn about the styles of Famous Artists such as Frida Kahlo, Franz Marc, Salvador Dali and Marc Chagall.

\*Students will learn how to look at the world around them differently this week!! They will be encouraged to blur the lines, observe the world around them and then Express to everyone how they see things! WE want them to Hang upside down, squint their eyes, look up at a tree like you were an ant and then flip all of your pictures Upside down on purpose!! "Upside down Drawings" and Silly Surreal situations will be a daily topic to get their creative sides competing with their Literary minds. So much of our early education is spent learning to read, spell, speak and write but children will flourish in these areas if given the chance to jump to the other side!

\*We will close the week with a **Dream Catcher Workshop** to catch those "not so Good" dreams that happen from time to time with personalized items.

## BRICKS FOR KIDS (Lego Movie Theme)

### August 12 - August 16

Do you think building is awesome? How about building with Emmet and Lucy?! Then you won't want to miss the Bricks 4 Kidz Building Is Awesome Camp! Join Emmet, Lucy, Unicorn Kitty and Benny on a journey to stop Bad Cop\* and Lord Business from super-gluing the world. Campers will put their engineering skills to work as they build motorized models, 3D figure models and mosaics. They'll love these awesome models based on The LEGO® Movie and its sequel. Whether you take an imaginary ride on Metal Beard's ship or Emmet's double-decker couch, be sure to get on over to Bricks 4 Kidz where building is awesome!

Students will be broken up into two classes based on age. Older kids will be working on STEM based project with Bricks for kids. Projects will include mechanics and moving parts with their builds.

#### **K-2nd Topics**

Day 1: Friends - Lucy & Emmet

Day 2: Villains - Lord Business & Mayhem

Day 3: Superheroes - Batman & Green Lantern

Day 4: Master Builders - Metalbeard & Benny

Day 5: Rulers - Unicat & Vitruvius
